

## Brixham Fish Market

Sarah Wollaston Chair, Health and Social Care Committee, Chair, Liaison Committee (Commons), Chair, Liaison Committee

The port of Brixham in my constituency lands the most valuable catch in England, but it has now reached capacity and needs urgent infrastructure investment in order to expand opportunities. Will the Minister assure me that our strategically important fishing industry and processing sectors will be fully considered in future infrastructure plans, and will he meet me to discuss Brixham port's exciting plans for development, which need only modest investment to help them get rapidly off the ground?

Robert Jenrick The Exchequer Secretary

I would be happy to meet the hon. Lady. We are investing in port infrastructure, as indeed in other infrastructure projects across the south-west. I believe it was she who asked the Chancellor in the lead-up to the Budget to make that national commitment to Dawlish, for example. We are keen to listen to her opinions in this respect, and I would be very happy to meet her.
